Examples: W3C XML, IPv6, LDAPv3, DNSSEC.....

XBRL Europe milestones

11 of December 2013, **_XBRL Europe Day_**_,_ Luxembourg, Keynote Speech of Francisco García Morán, Chief IT Advisor of the EC, on **_ICT Standardisation Policy: Framework, Challenges and Opportunities in the European Landscape_**

XBRL Europe Task Force co-chaired by XBRL Sweden and XBRL Spain to interact with the **European Multi-Stakeholders Platform on ICT Standardisation** (MSP-ICT), promoting XBRL as "**_Identified Standard_**", **REGULATION (EU) No 1025/2012**.

XBRL Identification Submission Form sent (_XBRL NL_) to the MSP-ICT on Oct. 2014.

Letter of XBRL EU to XBRL Jurisdictions / stakeholders re-circulated on Nov. 2014

Evaluation Report for XBRL 2.1 (_XBRL International was here_), approved in the MSP meeting of Feb. 2015 and submitted to the Commission accordingly.

COMMISSION IMPLEMENTING DECISION (EU) 2016/120

WHEREAS

XBRL 2.1 is a technical specification for digital business reporting, managed by a global not for profit consortium, XBRL International. The consortium is made up of approximately 600 public and private sector organisational members from around the world. **The goal of this consortium is to improve reporting in the public interest.**

XBRL 2.1 can be applied to a very wide range of business and financial data. It streamlines the preparation of business and financial reports for **internal and external decision making**. By using XBRL 2.1, companies and other producers of financial data and business reports can **automate the processes of data** collection.

THE EUROPEAN COMMISSION HAS ADOPTED THIS DECISION:

Article 1 **The eXtensible Business Reporting Language version 2.1 is eligible for referencing in public procurement**.

Article 2 This Decision shall enter into force … the Official Journal of the European Union.

Done at Brussels, 28 January 2016. The President **Jean-Claude JUNCKER**
